SUMMARY

Developer and AI automation specialist, and founder of Appnado IT Solutions, with 3+ years building AI assistants, automation pipelines and production web and mobile apps. Currently full-time at NOBS BIZ LLC (SprayGunner) and part-time for Toivelo and Railway Media, shipping RAG assistants, content pipelines, ad-ops tooling and price monitoring end to end, from scoping to deployment.

TECHNICAL SKILLS

AI & Automation: Claude API, OpenAI API, RAG (Supabase pgvector), n8n, workflow automation, webhooks, Google Ads API, scraping & monitoring

Frontend & Mobile: React, Next.js, React Native (Expo), Astro, TypeScript, JavaScript, Tailwind CSS

Backend: Node.js, Python (FastAPI, Celery), Go, C#/.NET, Java/Spring Boot, REST APIs, tRPC

Data: PostgreSQL, Supabase, Prisma, Drizzle, MySQL, SQLite, Redis

Infra & Tools: Docker, Vercel, Netlify, DigitalOcean, nginx, Git & GitHub, AI-assisted development (Claude Code)

WORK EXPERIENCE

Developer & AI Automation Specialist — **NOBS BIZ LLC · SprayGunner** Full-time · 2026 – Present

- Built AirBrush Arsenal, a cross-platform React Native (Expo) app with model-specific compatibility lookups, a gear locker, product registration and identifying an airbrush from a single photo.
- Rebuilt Ask Atom, SprayGunner's airbrush expert assistant, as a RAG system on Next.js, Supabase pgvector and OpenAI.
- Built a competitor price monitor (Node.js, SQLite, DigitalOcean) that flags when SprayGunner is undercut and audits the whole store daily for $0 prices and sudden price jumps.
- Shipped Airbrush Learn (beginnerairbrush.com), an Astro site fed by an n8n content pipeline, and a Reddit-to-Discord bot that uses OpenAI to surface relevant posts.

Developer & AI Automation Specialist — **Toivelo** Part-time · 2026 – Present

- Built a Claude API script generator that runs the team's two-prompt video-script workflow over a queue of titles unattended, replacing manual work in the Claude web app.
- Built and maintain internal tooling, including a time tracker that produces the monthly timesheet and invoice.

Developer · Search Ads Team — **Railway Media** Part-time · 2026 – Present

- Built a Google Ads campaign builder (Python, FastAPI, Google Ads API) that clones a template Search campaign into a new paused campaign from pasted keywords, headlines, descriptions and sitelinks.
- Building a self-serve listicle CMS (Next.js, Supabase) and affiliate landing pages, including reliableproductratings.com (Next.js static export on nginx).

Founder & Full-Stack Developer — **Appnado IT Solutions** 2024 – Present

- Build automation systems, internal tools and web platforms for clients, replacing manual business workflows with automated processes.
- Own the full delivery lifecycle: scoping, architecture, development, deployment and client communication.

Freelance Software Developer — **Upwork** 2023 – Present

- Built a C#/.NET trading automation system with real-time execution, strategy logic and third-party API integration.
- Delivered API, webhook and automation work for international clients from concept to deployment.

Software Developer Intern — **ICTC, Ateneo de Naga University** May – July 2024

- Developed backend features with Java/Spring Boot for a training-center management system, working with relational databases and Git in a team.

SELECTED PROJECTS

RenderFlow — AI Video Studio Python · FastAPI · Celery · Redis · Postgres · ffmpeg

Turns a topic into a finished narrated YouTube video: script, scene images, AI host, thumbnail and render, with per-scene regeneration before the final pass. Now a multi-user SaaS with a job queue.

CentroSpace Next.js · Prisma · Postgres · NextAuth

Personal command center for running several client jobs at once: schedules with overlap warnings, Kanban projects, time logs that become invoices, finance and per-client share links.

Barangay Management System Tauri · React · Go · MySQL

Offline-first desktop system for local government records with automated PDF certificate generation, replacing a manual paperwork process.

My Pet — EatWagLove JavaScript · Supabase · Vercel

Tamagotchi-style virtual pet that teaches real pet care, with 30 dog and cat breeds, daily care loops and rewards tied to EatWagLove content.

EDUCATION

Bachelor of Science in Computer Science — Ateneo de Naga University 2021 – 2025

CERTIFICATIONS & AWARDS

Best Application Award — LA'AD Festival 2023 — Ateneo de Naga University 2023

SAP Certified Application Associate — SAP Business One — FIT Academy 2022
